

## Technical Information Sylvamix® Special

### Product Description

Melcourt Sylvamix® Special is the prescription mix service fulfilling the specific requirements of individual growers, incorporating modifications to the standard formulae of Sylvamix® Potting and Sylvamix® Nursery Stock

- Contains Melcourt Growbark®, Melcourt Sylvafibre®, two widely used and well-proven products in peat-free and peat-reduced growing
- Can include other bulk ingredients such as coir, green compost, clay granules
- Can include controlled release fertilizers
- Can include pesticides
- Available in 70 litre bags, bulk bags and loose bulk

### User Benefits

- Enables cost-effective peat-free production
- Prescription service enables product tailored to individual needs
- Manufactured from completely renewable, sustainable ingredients
- Detailed technical back-up available
- Compatible with most irrigation systems
- Free-flowing texture allows easy filling of pots

### Crop Management

- Crop management will depend on the particular formulae. Detailed technical advice is available from Melcourt

### Typical Crop Applications

- Sylvamix® Special growing media can be made for a wide range of applications such as ericaceous growing and organic media.

### Storage

Sylvamix® Growing Media should always be stored carefully in clean, dry, cool conditions away from any potential contaminants and direct sunlight. Avoid conditions which allow the product to become dry and dusty and if this occurs use suitable dust protection. Sylvamix growing media can safely be stored for up to six months under suitable conditions, unless they have been supplied with controlled release fertilizers in which case they must be used within 14 days from purchase.

### Pesticides

Where Sylvamix is supplied containing pesticide, (which will only ever be at the customers' request), it is essential that the users of the product are made aware that pesticide has been incorporated, and that the full safety and handling instructions have been made available to users. There may also be restrictions on the storage period once pesticide is incorporated into the Sylvamix. Melcourt will advise the customer where this is the case, together with a link to the relevant Product Safety Data sheets.
