Melcourt Soil Ameliorants, Composts and Topsoil Product Specification Guide

Note:

All values given in the Product Specification are typical. However, some variation may occur from time to time. Melcourt Industries Ltd reserves the right to alter the specification without notice, for the purpose of product improvement

The typical values above for bulk density, dry matter, organic matter and pH have been tested in accordance with the methods as set out in the following British Standards

- BS EN 12580**, Soil improvers and growing media - Determination of a quantity
- BS EN 13037**, Soil improvers and growing media - Determination of pH
- BS EN 13038**, Soil improvers and growing media - Determination of electrical conductivity
- BS EN 13039**, Soil improvers and growing media - Determination of organic matter content and ash
- BS EN 13040**, Soil improvers and growing media - Sample preparation for chemical and physical tests, determination of dry matter content, moisture content and laboratory compacted bulk density
- BS EN 13650**, Soil improvers and growing media - Extraction of aqua regia soluble elements
- BS EN 13652**, Soil improvers and growing media - Extraction of water soluble nutrients and elements

FSC Certified: These products are from FSC Mixed Sources at a minimum of 50%, FSC certificate number CU-COC-806457.
