

Melcourt's Service to Landscape Architects, Garden Designers, Project Designers and Product Specifiers

Melcourt provide practical, knowledgeable help and assistance at all stages of your project as follows:

Project Stage	Key Issues	How Melcourt can Help
Design	Selecting a suitable product	Use the details on the website to review all the potential products. If you still need help, either call us on 01666 502711, or complete our On-line Product selection Enquiry form
	Designing out the problems	For information on common problems encountered, refer to the Correct Design, Installation and Aftercare section of the website
	Correct product specification within your design	Each Melcourt product has a two page Technical Information sheet available from the website. Page 2 of the sheet contains suggested wording to specify the selected product.
	Budget costings	Written quotations are available for all our products from our Tetbury office
	Best Value	Decide on your value criteria after looking at our Best Value advice
	Site and/or office visits	We are always available to meet you and discuss your requirements on site or at your offices, at a time convenient to yourselves.
	Technical product data	Each Melcourt product has a two page Technical Information sheet available from the website which contains a full technical specification of the product.
Tendering	Product samples	Typical product samples are available from our Tetbury Office. They will be posted by return.
	Staff technical updates	We are always happy to meet your staff and keep them up to date with the Melcourt and Industry developments at a time convenient to yourselves
	Deciding whether to nominate or specify a product.	For advice on nominating or specifying your selected product, refer to our section entitled Product Specification within Tender Documents.
Tendering	Comparing Product Quotations	Our Checklist for Landscape Product Quotation Comparison provides a useful guide when comparing quotations.
	Comparing Product samples	Our Checklist for Landscape Product Sample Approval provides a useful guide when comparing product samples.
Implementation	What about Product Installation and Aftercare?	For advice on installation and aftercare, refer to the Correct Design, Installation and Aftercare section of the website
